## EMPLOYEMENT

---

**S. Chowla Postdoctoral Research Assistant** 2023 - present  
*Pennsylvania State University*

## EDUCATION

---

**Ph.D. in Mathematics** 2020 - 2023  
*Université Toulouse III*  
Advisor: Prof. Francis Filbet

**M.S. and B.S. in Mathematics** 2016 - 2020  
*École Normale Supérieure de Rennes*

**Agrégation externe de Mathématiques** 2018 - 2019  
*École Normale Supérieure de Rennes*  
Major: Scientific Computing

## RESEARCH INTERESTS

---

My research interests lie in the **asymptotic** and **numerical analysis** of **partial differential equations** for interacting agents in models with application in **kinetic theory** and **neuro-science**.

I focus on establishing links between the multiple scales inherent to these systems. Specifically, I have worked on longtime behaviors and macroscopic limits of these systems. I aimed, on the one hand, at proving theoretical results quantitatively bridging these scales and, on the other hand, at designing numerical methods which preserve these connections.
